

**C**reating *Lasting Impressions* is a demanding process that begins with creative imagination and successfully ends with a beautiful and memorable gift, award or commemorative. Since 1984 The Medalcraft Mint has won more 1st place awards for superior metal striking than anyone in our industry. These awards truly recognize the talent and skill of the entire Medalcraft Mint team. Our design creativity and dedication to excellence has helped thousands of customers' dreams and desires become reality. It is our goal to translate even the smallest detail and that unspoken desire into the perfect *Lasting Impression*.

# THE ART OF MINTING

## ONLY SOLID MATERIALS

All medals, medallions and other items are die struck from solid brass, nickel-silver, bronze, copper, as well as precious metals. Only the finest materials available, selected for their metallic composition and purity, are used to produce The Medalcraft Mint products.

### Thickness

The gauge of material is carefully selected to enhance the striking of your design and achieve the relief desired. Some of the various gauges available are shown on the scale below. When high relief is appropriate, a thicker or heavier gauge material is required.

## DIE STRIKING

Each design is hand-sculpted or engraved to scale in a steel die block. Coining presses "strike" the material, forcing it into the die cavity, making an exact impression of the image from the hand-cut die.

Standard antique finish in brass, nickel-silver and copper materials. Optional polished highlights.

## FINISHES

Each Medalcraft Mint product receives the finest hand-finished patina to enhance the aesthetics of the design, and is protected with a durable jeweler's lacquer to prevent tarnishing.

Most of our products feature our standard antique finish. Other finishes are available upon special quotation. Optional finishes are shown throughout the catalog.

## BACKGROUNDS

Pictured above is a special medallion we've minted to demonstrate twelve standard backgrounds. While not always necessary, it's often a nice enhancement to provide contrast for your custom piece by featuring a "patterned" background. This sample wheel can be used as a guide to assist you in the selection of a background.

Choose from:

1. Stipple - Extra Fine
2. Stipple - Fine
3. Stipple - Medium
4. Stipple - Heavy
5. Lined
6. Florentine
7. Pebbled - Heavy
8. Pebbled - Medium
9. Pebbled - Light
10. Cobblestone
11. Irregular Basket Weave
12. Weave

### GAUGE SCALE (approximate):

- .080" thick (12 Gauge)
- .102" thick (10 Gauge)
- .125" thick (8 Gauge)
- .144" thick (7 Gauge)
- .162" thick (6 Gauge)
- .188" thick (5 Gauge)
- .250" thick (2 Gauge)

### Polishing

Polishing is a popular optional finishing technique that creates a shiny, jewelry-look. Each item is hand-polished. Pricing is determined by the amount of surface area to be polished. Call for a quote.

### Proof-Like Minting

Proof-like minting capabilities, a contrasting frosted and mirrored effect, are available. Call for a quote on this elegant option.

### Enamel/Color Fill

One or more colors can be added to medals using hand applied epoxy enamel. Pricing is based upon the number of colors, surface area and intricacy of the enameled area. Note: The die needs to be created to hold enamel. Call for a quote on this option.

# PRODUCTION NOTES

2D medal

Multi-level 2D

3D medal

Complex (portrait or sculpt)

## Die Charges

This one-time expense is for creating the dies to strike your customized design, corporate logo or advertising message. Die charges are based on time, material and simplicity/complexity of the design.

## Depth of Relief

Depth of relief is determined by the nature of the design of subject matter being portrayed, and will range from low relief to high relief. Our sculptors and die engravers are expert craftsmen who will translate your design into an exquisite coin or medallion by achieving the appropriate depth of relief.

## Lead Time

**STOCK PRODUCTS** ship in 1-3 working days. Large volume orders, engraving, optional finishes may take longer. For personalized engraving, add 5-7 working days.

**CUSTOM DESIGNS** ship in 3-6 weeks depending upon *your needs*, volume, materials, finishes, enhancements and personalization. Shorter lead times can frequently be accommodated. Re-orders generally ship in 2-3 weeks.

## Minimum Order Pricing

Pricing throughout this catalog reflects our standard minimum order of 100 pieces for custom designs. Minimum order for stock products is \$25(Z).

## Shapes

A large inventory of stock shapes are available for your use and include many circles, squares, ovals, rectangles and specialty shapes. Custom shapes are available at an additional charge. Call for quote.

## Artwork

Artwork is used for presentation purposes and to create the die. Electronic artwork is preferred. See inside back cover for specifications.

## REVERSE SIDE CUSTOMIZATION

Most of the products in this catalog can be produced with a custom imprint on the backside. Your Customer Service Rep can provide you with complete information. Backside customization options include:

### 1. Die Striking

Achieved simultaneously with the front side striking. There is no additional run charge provided the backside is standard antique finish. A second one-time die charge may apply.

### 2. E-Prom (engraved graphics)

A digitized custom logo or graphics can be engraved onto the medal. A one-time e-prom (digital, custom graphic program) charge is \$100(G). Call for quote on the run charge. It can vary based on the size and amount of detail to be engraved.

### 3. Engraving Text

Engraving is \$.70(G) per line. Set-up charge for straight line copy is \$10(G); set-up for arc-engraving is \$15(G) per arc. Oxidation (darkening of the engraved letters) is \$.45(G) per medal. Typewritten instructions required.

# THE MINTING PROCESS

Original artwork created on a computer is used for presentation purposes and as reference material by the craftsmen and artisans who produce the dies.

Pantograph machines are used by skilled craftsmen to cut two-dimensional dies.

Using the same hand tools and techniques employed by metal craftsmen through the centuries, engravers add depth and detail to make the image come to life.

Sculptor hand-carves complex dies. A multi-step process is employed to ensure accuracy when creating the die.

A digital image of the proof from the die is e-mailed for customer approval prior to the actual minting process.

The approved die is hardened by heat treating. The die is subjected to temperatures above 1700°F for up to eight hours.

A blank piece of metal previously cut to the desired shape is placed into a coining press on top of the die. Up to 1000 tons of pressure are used to "strike" the image into the metal.

Excess material is trimmed off in a trimming press.

After cleaning, the freshly minted piece goes through an extensive hand finishing process depending on customer wishes.

The final step is a coat of jeweler's lacquer sprayed on front and back of the piece to protect it from tarnishing.

# CUSTOM MEDALS & MEDALLIONS

2½" AND LARGER

## CUSTOM MEDALS & MEDALLIONS

2 1/2" & LARGER

<b>Dies</b>	A one-time service fee applies for new designs. See page 41.	<b>GAUGE SCALE</b> (approximate):
<b>Edge Treatment</b>	All round shapes .162" thick or thicker have lathe trimmed edges.	.144" thick (7 Gauge)
<b>Edge Marking</b>	Available on medals at least .125" thick with lathe trimmed edge. Repetitive copy set-up: \$25(G), plus \$.70(G) per piece. Maximum of 30 characters. Typewritten instructions required.	.162" thick (6 Gauge)
<b>Optional Attachments</b>	Screw post welded on back \$.70(G) each. Hanging loops added, \$2.25(G) each. For .162" thickness and above, all medallions have lathe trimmed edges, therefore, a hanging loop cannot be part of the die and must be added as a secondary operation. If less than 25 pieces, add a set-up charge of \$25(z) per order.	.188" thick (5 Gauge)
<b>Packaging</b>	Individually poly bagged and inserted into cardboard box for protection.	.250" thick (2 Gauge)
<b>Optional Materials</b>	Nickel-silver add 20%; copper add 5%; precious metals, call for quote.	
<b>Optional Finishes</b>	Gold-plating, polishing & enameling available upon request; call for quote.	

**Pricing (A)** reflects round brass medallion with standard antique finish.

Medalcraft Stock Catalog

## ARTWORK/REFERENCE

The following guidelines will help to assure an accurate reproduction of all customer supplied reference materials:

### 1. Electronic Artwork

Electronic artwork is preferred. Vector based artwork saved as an EPS file is acceptable for disk or e-mail. Files must contain no placed images, and fonts should be converted to outlines. To e-mail artwork, contact Customer Service for further information.

### 2. Hard Copy Artwork

Original, high contrast black & white art with a minimum of 600 DPI and a scale of 4:1 is acceptable. Sharp, precisely defined edges are critical. No gray or fuzzy areas.

Artwork not complying with these guidelines may require additional development or conversion costs. We reserve the right to quote die charges if art supplied is different than originally quoted or doesn't meet the above requirements.

If any part of the design is 3-dimensional, please include additional quality reference materials such as photographs, line drawings, etc. to ensure customer expectations are closely met.

## DIE SERVICE FEE

A one-time service fee will be charged for all new dies created to produce (die strike) your corporate logo, design or advertising message. Service fees vary and are based on time, material and simplicity/complexity of design. Call Customer Service for a quotation.

Included in the die service fee is a built-in insurance policy. As long as The Medalcraft Mint retains the die on our premises, the customer is ensured that they can request coinage utilizing that die. Should the die ever break, The Medalcraft Mint will replace it at no additional cost to you. Dies remain the property of The Medalcraft Mint, retained for your exclusive use.

Dies are cut by masters who pay strict attention to detail, absolute quality and your design specifications. Our sculptors and die engravers work diligently to reproduce your design exactly, but interpretation and the medium are an important factor. Some things, such as water or glass, are transparent in nature and are difficult to render in metal. Portrait dies are subject to the interpretation of the sculptor or die engraver; interpretations may differ. A lead proof approval will be required prior to striking.

## LEAD PROOFS

When your die is completed, a lead proof will be furnished at no charge. Production will not begin without approval. Medalcraft Mint will not be responsible for the final acceptance of any product for which you or your customer have refused to inspect and approve a lead proof made from the die.

## TRADEMARKS

The Medalcraft Mint assumes clients are authorized to use trademarks presented to us for reproduction. We assume no liability in trademark or copyright disputes. The logos, designs, insignias and trademarks imprinted on products shown in this catalog have been reproduced only as examples of the type and quality of our production processes. They are not presented for resale, nor are they to be construed as endorsements.

## REVERSE SIDE OPTIONS

Most of the products in this catalog could be produced with a custom imprint on the backside or second side. In every instance of backside imprints, contact your Customer Service Rep for complete information. Backside imprint options:

### 1. Die Striking

Achieved simultaneously with the front side striking, this imprint method does not create any additional run charge, but does involve a second die charge.

### 2. Engraving

A wide range of engraving styles are available, including Diamond-cut, Deep Rout and burnishing. Quote required for Deep Rout and burnishing. Typed instructions are required.

## PRECIOUS METALS

The Medalcraft Mint can strike in fine silver and karat gold materials, as well as other precious metals. Due to market fluctuations, you must contact The Medalcraft Mint for current "spot" pricing information.

## ORDERING INFORMATION

Custom orders require a customer purchase order in writing. A 5% over/under production run constitutes completion of order billed pro rata. Any quantity less than listed minimum requires factory approval and quotation and may be subject to an additional set up charge.

## CATALOG PRICING

Prices shown in catalog are subject to change without notice. Every effort will be made to provide advance notice of price changes.

## CORRECTIONS/CANCELLATIONS

Any cancellation or significant change of an order in process is required in writing and will be subject to costs incurred to-date plus a \$62.50(G) cancellation fee.

## DROP SHIPMENTS

When an order is shipped to multiple destinations, a drop-ship charge of \$6.50(G) per destination applies. Freight charge additional.

## SPLIT SHIPMENTS

When order calls for delayed split shipments, merchandise will be produced and billed with shipments delayed per your request within a 12 month period of time. A charge of \$15.00(G) per split shipment applies.

## CUSTOMER-SUPPLIED INSERTIONS

For insertion of a customer-supplied card or literature piece (in suitable size), add \$.15 (G) each.

## SHIPPING

Medalcraft Mint merchandise is shipped F.O.B. The Medalcraft Mint. Unless a specific method of shipment is requested, we will use our judgement in selecting the mode of shipment. Responsibility for the merchandise ordered is transferred, with the proper transfer of goods, to a recognized carrier. If merchandise is damaged as a result of the carrier's negligence, call the appropriate carrier for inspection. We will assist in processing the claim.

## RETURNS & ADJUSTMENTS

Every effort is made to produce your order to exact specifications. Should a misunderstanding occur, please contact your Customer Service representative. Prior to returning product, contact your Customer service representative for a Receiving Authorization number (RA#) within 20 days of receipt of merchandise. Medalcraft Mint is not responsible for circumstances beyond our control.

## FREE VIRTUAL SAMPLES

Ideal for showing your clients what a product might look like with their design on it. More than 50 products are available as virtual samples at [www.medalcraft.com](http://www.medalcraft.com).
